

Heat and Temperature

Temperature is the degree of hotness or coldness of a body. Its symbol is T and SI unit is Kelvin. Temperature is measured using thermometer. Heat is the amount of thermal or internal energy of a body. Heat is a form of energy and it flows from hot places to cold places. Heat can be measured using Joulemeter. Differences between temperature and heat Temperature Hotness or coldness of a body SI unit is kelvin measured using Thermometer It does not flow It is a form of energy Heat

Amount of thermal energy of a body SI unit is Joule measured using Joulemeter It flows from hot to cold It is a form of energy
